

Eugene Rudykh

Backend Developer (Golang)

Profile

I am a backend developer with nearly 5 years of experience in the field, specializing in Golang. I have worked for several IT giants all over the world and have accumulated a wealth of knowledge and experience.

My passion lies in constantly advancing and expanding my skill set to develop better and faster products. I have a strong love for learning new technologies and the satisfaction of improving software features, stability, and user experience.

I am a strong team player, able to effectively communicate with people and not afraid to ask questions when necessary.

Employment History

Golang Developer, Exness, Limassol (Remote)

October 2022 - February 2023

Exness is a financial broker, located in Cyprus. My role is a backend developer in a Payer team. We are creating a wallet for user money, and ways to top it up or withdraw funds.

Responsibilities:

- Participating in Payer platform creation
- Creating backend architecture
- Writing Golang code, tests
- Working with highload
- Participating in sprint lifecycle, planning, grooming, etc.

Technical Lead Golang, Holland&Barrett, London (remote)

May 2021 - September 2022

H&B is a health company based in UK. We were creating wellness app, that supposed to improve people's lives in different life situations.

Responsibilities:

- Creation of H&B mobile app backend in Golang
- Hiring, onboarding and teaching backend developers
- Creating backend architecture
- Writing clean Golang code, tests
- Planning sprints, participating in creating roadmap
- Coordinating teams to achieve goals
- Creating backlog with tech improving tasks

Backend developer (Golang and Java), AliExpress, Moscow

February 2020 - 2021

AliExpress is a huge worldwide marketplace. I worked in Russian part of it, in several teams in marketplace wing.

Responsibilities:

- Creation of products synchronization service, from VK (social network) to AliExpress
- Searching for knowledge and API in Ali platform
- Participating in services architecture discussions
- Complex data base scheme creation
- Improving service productivity due to transfer from MVP to Highload
- Creating new platform for go, to use in Ali. With this platform devs can create new service with several commands, and will have all infrastructure they(logs, tracing, metrics, etc...)

Golang Developer, Ozon, Moscow

July 2018 - February 2020

Ozon is one of the largest marketplace in Russian market. I worked in several teams, in marketing and marketplace directions. I started as an intern and grew to middle role over several years.

Responsibilities:

- Seller center development
- Service productivity improvements
- Communicating with other departments
- Managing tasks from beginning to production, through QA, and creating tasks for Frontend team
- Daily duty and problem solving in process
- Code Review
- Microservices development
- Creating metrics and dashboards with Prometheus and ClickHouse
- Creating Unit and integration tests
- Participating in development of Shop In Shop inside Ozon - small shops for marketplace

IT support officer, Lazada, Moscow

December 2016 - May 2018

Lazada is a marketplace for Asian market. My role was helping people with IT needs, like hardware and software support, installation and procurement.

Responsibilities:

- Creating and leading IT projects, from beginning till the end
- Tenders deploying and managing
- Supporting IT issues and server maintenance
- Negotiations and contract signing with vendors and partners
- Installing new servers and server equipment
- Expanding network infrastructure
- Supporting iPads, iPhones, Laptops, and all the equipment user might need
- Creating critical tickets and work as a team with global IT to resolve urgent issues
